Skills

Languages: Python, Java, JavaScript, HTML, CSS, SQL
Frameworks: Spring, Laravel, Node, Angular, Vue, React
Libraries: Bootstrap, Tensorflow, SciKit, NumPy, NPM
Databases: MySQL, MongoDB, PostgreSQL, Redis
Testing: Jest, Cypress, Mocha
Automation: Jenkins, Git
Cloud/DevOps: AWS, Digitalocean, Heroku, Cloudflare

Experience

Software Engineer

Sept 2019 – Jun. 2024

Predeet (Trained Football Insights), Remote

- * Developed deep learning models for analyzing football/soccer events. Deployed and serve models on a pm2 cluster to manage multiple analysis.
- * Built, automated and maintained deployment pipelines for apps.
- * Managed DNS, SMTP, shell scripts, firewalls and ENV configurations for local and production server.

Software Engineer

Feb. 2023 – Nov. 2023

Platform Science (Fleet Management and Telematics), USA

- * Developed a portal Dashboard, dashboards/alerts connecting to data pipelines from Looker & snowflake.
- * Saved Platform Science (> \$10,000) each month by restoring user workflow upon login and application reuse. Reducing several page load calls to default HERE maps page.

Software Engineer

Aug 2021 – Oct. 2020

Accrue (Pricing Optimization), USA

- * Developed a high-performing rate card viewer working with data sourced from 3rd parties (Salesforce, HubSpot, CSV upload). Rate cards also include dynamic data configuration of displayed rates.

- * Created and developed a design structure for a modern Quote builder in connection with the data ingested to oversee quote building, supervision and automation.

Education

University of Lagos (2018)
